About the Use of This Manual

Please read this manual thoroughly since the information in it may allow you to know how to operate your car safely and properly, and enjoy your driving at maximum.

The strategy of our company is to make continuous improvements to the products; therefore, we reserve the right to make changes in the product without further notice after the manual is released. The illustrations in this manual are for reference only. Please read this manual before using the entertainment and navigation system, and strictly follow the instructions for operation

Announcement

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form, electronic, mechanical recording or other means

without prior written permission from the company.

Important Safety Information

- Do not attempt to fit, repair or modify the entertainment system by yourself, because there are high-voltage components in the device, which may cause electric shock. For internal inspection, adjustment or repair, please consult a local Authorized Repairer.
- Do not allow this entertainment and navigation system to come into contact with liquids. If liquids or foreign objects enter into this entertainment and navigation system, please park your vehicle at a safe place, immediately switch off the ignition and contact a local MG Authorized Repairer. Do not use the entertainment and navigation system in this condition because doing so may result in a fire, electric shock, or other failure.

- If the entertainment and navigation system has smoke, abnormal noise or odor, or any other abnormal sign shows on the LCD screen, please cut off the power immediately and contact a local MG Authorized Repairer for service. Using the entertainment and navigation system under such condition may result in permanent damage to the system.
- It is strictly prohibited to operate the entertainment and navigation system while driving, so as to avoid the influence on the traffic safety caused by inattention. Please park your car in a safe location and apply the parking brake before making the necessary adjustments or watching "Video Picture".
- Extreme high/low temperatures will interfere with the normal functions. If you shut down the engine and park the car in direct sunlight or at a cold place for a long period of time, it may become extremely hot or extremely cold in the car, the entertainment and navigation system may not work properly in such environments. Once the internal temperature returns to the normal range, the system will restore the normal function. If it is unable to restore, please contact a local MG Authorized Repairer for service.
- In case of vehicle refuel, you shall power off the entertainment and navigation system.
- In order to avoid the battery from running out, make sure to start the vehicle engine while using the entertainment and navigation system, otherwise it will cause the battery to run out.
- If the battery is disconnected or runs out, the data in the memory of the entertainment and navigation system will be cleared.
- The navigation function of entertainment and

navigation system is used for assisting you to drive. The routes and navigation information displayed by the entertainment and navigation system are for reference only. Thus please make sure to observe the rules for safe driving, actual traffic lights and all the current traffic rules.

- When using a mobile phone, keep the mobile phone away from the screen to prevent disruption of the video signal in the form of spots, colored stripes, etc. on the screen.
- To protect the screen against damage, be sure to touch the panel buttons with your finger (a touch pen can be used for special calibration).

Instructions

- This manual contains important information and warnings & instructions for entertainment and

navigation system. For additional information related to the safety of your own and occupants, please refer to other manuals accompanied with the vehicle.

- Please do not use vehicle heat insulation film or similar products on the windscreen, otherwise, GPS or internet signal shielding may occur.
- The GPS positioning result of the entertainment and navigation system is for driver's reference only. In case of any abnormal situation, please drive according to the actual road condition.
- Communication signal will be subject to the signal coverage range of service provider; if there is no signal, part of services relying on network will be restricted.
- Maintain the volume of the voice prompt at an appropriate level while driving, so that you can be aware of the road and vehicle condition.

- After switch off engine and lock doors, the entertainment system will also shut down. if you want to continue the use at this time, you need to press the power button, but there is a risk of low vehicle battery power, please restart the engine.

Cautions for Using Screen

- Please protect the screen against direct sunlight. Extended exposure to direct sunlight will result in screen malfunction due to high temperature.
- When the temperature is above or below the operating temperature range (-20°C to +65°C), please do not use the LCD screen, because the screen may not operate normally and could be damaged.
- Make sure that the warm or cool air from the air conditioning system will not be distributed to the screen directly, damages to the entertainment

navigation device may occur due to heat or moisture.

- Do not make drag-and-drop operation or press the screen hard, otherwise, scratches and damages may occur.
- To remove dust from the screen or clean the screen, please turn the system off first, and then wipe with a dry soft cloth. When wiping the screen, take care not to scratch the surface. Do not use irritative or abrasive chemical cleaners.
- When the backlight reaches the end of its service life, the screen will become dimmer and the image will no longer be visible. In that case, please contact an MG Authorized Repairer for service.

Playable File Format for Entertainment System Cautions

- For some types of external storage devices, the entertainment system may not be able to identify them, or to correctly play the files.
- Because of file characteristics, file format, recorded application, playback environment, storage conditions, and so on, it may not be possible to play some music files normally.

Audio Support

The entertainment system supports the following audio formats, and other formats may not work normally.

MP3, AAC, OGG, WAV, APE, FLAC

Video Support

The entertainment system supports the following video formats, and other formats may not work normally.

AVI, MP4, 3GP, MOV, MKV, FLV

Image Support

The entertainment system supports the following image formats, and other formats may not work normally.

JPEG, GIF, PNG, BMP

Document Support

The entertainment system supports the following text formats, and other formats may not work normally.

TXT, PDF

Basic Operation

Control Panel

This chapter describes the functions of physical buttons

1. Volume- Button

Press to turn down the volume.

2. Volume+ Button

Press to turn up the volume.

3. Home Button

Press to return the home page.

Steering Wheel Control Button

1. Left ★ Button

When the Quick Menu One-touch Open mode is selected:

Short press to open the quick menu.

When the CarPlay/Android Auto mode is selected:

Short press to open the Apple CarPlay or Android Auto function.

When the AVM One-touch On/Off mode is selected:

Short press to open/close the 360° function.

2. Phone Button

Short press to answer the call or hang up the phone.

Long press to reject the call.

3. IPK mode Button

When the right ☆ Button is selected for SRC mode:

Short press to arouse or turn off the IPK mode .

4. Right ☆ Button

When the SRC mode is selected:

Short press to switch to next available media audio source.

When the AC mode is selected:

Short press to arouse or turn off the air conditioner panel.

5. Right multi function Button

5.1. When the SRC mode is selected and the IPK mode is not selected:

When playing music:

Press the button to the left to go back to the previous song, Press the button to the right to forward to the next song.

When using radio:

Press the button to the left to seek the previous radio frequency, Press the button to the right to seek the next radio frequency.

Press the top edge of the button to increase the volume, Press the lower edge of the button to decrease the volume, Short press the middle button to play or pause the media audio source.

5.2. When the AC mode is selected and arouse the air conditioner panel:

Press the top edge of the button to increase air volume, Press the lower edge of the button to reduce the air volume, Press the left edge of the button to Reduce the air conditioner temperature, Press the right edge of the button to Increase the air conditioner temperature.

Main Interface

Main Menu Bar Description

1. *Weather

Display current location and weather status.

2. Energy Management.

Tap to enter the Energy Management page.

3. Multi-media

Tap to go directly to the music/radio page.

Short press the steering wheel [SRC] button to switch between radio Bluetooth music, online music, USB music, CP/AA music

4. Air Conditioner

Touch to enter the Air Conditioner interface.

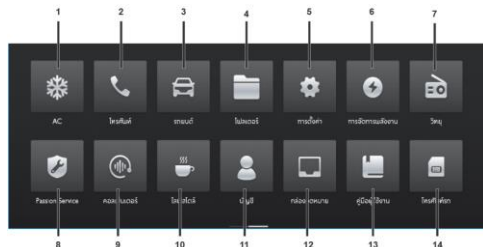

5. Apple CarPlay

Tap to enter the function , (please ensure your phone is compatible and plugged in beforehand).

6. Android Auto

Tap to enter the function, (please ensure your phone is compatible and plugged in beforehand).

1. Air Conditioner

Touch to enter the Air Conditioner interface.

2. Bluetooth Phone

Touch to enter the Car phone interface.

3. Vehicle Setting

Touch to enter the Vehicle Setting interface.

4. Folder

Touch to enter the Folder interface.

5. Settings

Touch to enter the Setting interface.

6. Energy Management.

Tap the Energy Management card to enter the Energy Management page.

7. Radio

Touch to enter the Radio interface.

8. *Passion Service

Touch to enter the Passion Service interface.

9. *Call Center

Touch to enter the Call Center interface.

10. *Lifestyle

Touch to enter the Lifestyle interface.

11. *Account

Touch to enter the Account interface.

12. *Inbox

Touch to enter the Inbox interface.

13. User Manual

Touch to enter the User Manual interface.

14. *Car Phone

Touch to enter the Bluetooth Phone interface.

Dock Bar

1. Home

Touch to return to the Homepage.

2. Navigation

Touch to enter the Navigation interface.

3. Music

Touch to enter the Music interface.

4. Car Phone

Touch to enter the Car phone interface.

5. 360°

Touch to enter the 360° interface.

Login

In the login interface, Open “MG iSMART” APP, Scan the QR code, after scanning successfully, login to enter homepage interface.

Switch login account, Enter Username and Password, Touch [Login] to enter homepage interface

Entertainment

Radio

Touch the Radio area in the main interface to enter the radio interface.

1. Touch to select the PM frequency.
2. Touch to select the AM frequency.
3. Touch to enter the Station List interface.
4. Touch to enter the Favourite interface.
5. Touch to search the previous station.
6. Play/Pause
7. Drag to change the frequency.
8. Touch to search the next station.
9. Touch to add/remove the favourite station.

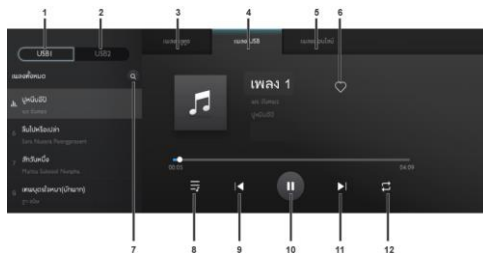

1. Touch to enter the Radio interface.
2. Touch to enter the Favourite interface.
3. Touch to enter the Station List interface.

Music

USB Music

Plug a USB storage device into the USB port, touch Music area in the main interface, and then touch [USB Music] to enter the USB Music interface.

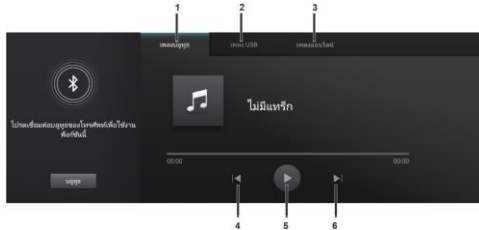

- 1-2. Choose to switch music source between USB1 and USB2 in USB Music interface.
3. Choose BT Music to switch the music sources.
4. Choose USB Music to switch the music sources.
- 5.*Choose Online Music to switch the music sources.
6. Touch to add/remove the song to favorites.
7. Touch to search music.
8. Touch to choose All songs/favourite.
9. Touch to play the previous song
10. Play/Pause the current song.
11. Touch to play the next song.
12. Touch to switch the play mode.

There are three playback modes: sequential playback/random playback/single loop

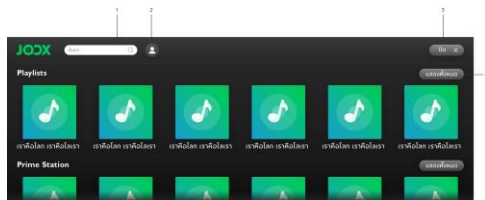

Bluetooth Music

To play music via Bluetooth, firstly connect the Bluetooth device.

1. Choose BT Music to switch the music sources.
2. Choose USB Music to switch the music sources.
3. *Choose Online Music to switch the music sources.
4. Touch to play the previous song
5. Play/Pause the current song.
6. Touch to play the next song.

*Online Music

- 1.Touch to search for the songs you want
- 2.Touch to log out of account
- 3.Touch to exit the JOOX interface and return to the home page
- 4.Touch to showcase all chart albums

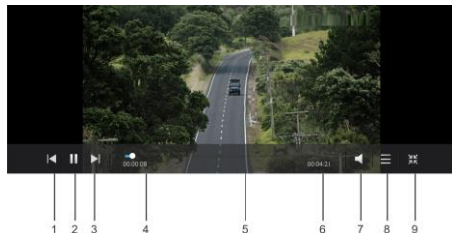

Folder

Touch [Folder] in the main interface to enter the interface, which including Documents, Pictures, and Videos.

1. Videos
2. Pictures
3. Documents
4. Choose[USB1] \ [USB2] to switch the files sources.

Video

1. Touch to play the previous video.
2. Play/Pause the current video.
3. Touch to play the next video.
4. Current elapsed time.
5. Drag the progress bar forward or backward to directly return or skip to certain playing point.
6. Total video duration
7. Adjust volume
8. Video list
9. Touch to exit full screen viewing mode.

Picture

1. Touch to exit full screen viewing mode.
2. Touch to view the previous picture.
3. Touch to rotate the picture.
4. Touch to view the next picture.
5. Touch to view the picture.

Bluetooth Phone

Instructions

- Connection to all mobile phones featuring Bluetooth wireless technology is not guaranteed.
- The mobile phone used must be compatible with the entertainment system so that all functions of Bluetooth phone of the system can be normally realized.
- When using Bluetooth wireless technology, this entertainment system may not operate all functions on the mobile phone.
- When transmitting voice and data via Bluetooth technology, the straight-line distance between this entertainment system and the mobile phone should not exceed 10 meters. However, the actual transmission distance may be shorter than the estimated distance, depending on the usage environment.
- If Private mode is selected on the mobile phone, hands-free call function may be disabled.
- When the entertainment system is turned off, the Bluetooth connection is also disconnected. When the system reboots, the system will automatically attempt to reconnect the previously-connected mobile phone. Even when the connection is terminated for some reasons, the system will automatically reconnect the specific mobile phone (except when the connection is terminated due to mobile phone operation) .
- Since Bluetooth adopts wireless connection, interruption or error may occur in the process of transmission in some extreme cases, so that the entertainment system cannot be paired and connected with a mobile phone. At this time, it is recommended to clear the paired devices in the

device list on the mobile phone and entertainment
system, and conduct pairing again

Bluetooth Enabling, Pairing and Connecting

1. Enable the Bluetooth Function

The Bluetooth setting includes Bluetooth on and off, device name, Bluetooth state, etc.

- Touch [Bluetooth] in the [Setting] on the main interface to enter the Bluetooth setting interface.

Touch  to enable Bluetooth function, vice versa.

- If the Bluetooth is turned on, the interface will display device name, vice versa.

2. Pairing and Connecting

After enabling the system Bluetooth function, start to pair and connect the mobile phone with the HU through Bluetooth.

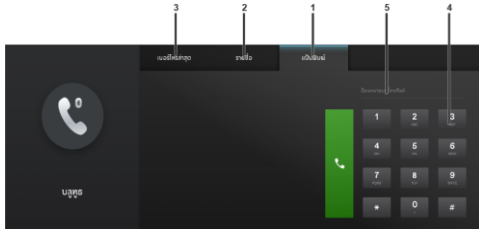

- 1 Enable Bluetooth function on the Bluetooth device and search the entertainment system to pair.
- 2 The Bluetooth device will receive the Bluetooth pairing request sent by the entertainment system.
- 3 After the pairing is completed, a prompt message of connection completion will be displayed. If the pairing failed, please repeat the procedure.
- 4 Touch device name to connect the device's Bluetooth.
- 5 Swipe and touch “” to delete the Bluetooth device.

Touch Keypad

Touch Phone area in the main interface to enter the Touch keypad input interface

You can view your contacts, call history, or enter a number to make a call.

1. Touch to enter KEYPAD interface.
2. Touch to enter RECENTS interface.
3. Touch to enter CONTACTS interface.
4. keypad
5. input Box

Address book

Touch [Address book] to enter the Contacts interface.

1. Touch to enter KEYPAD interface.
2. Touch to enter RECENTS interface.
3. Touch to enter CONTACTS interface.
4. Touch to select a contact.
5. Label: A contact with  label represents it's a Home phone number set in the synced mobile phone.
6. Label: A contact with  label represents it's a Workplace phone number set in the synced mobile phone

Recent

Touch [Recents] to enter the Call History interface.

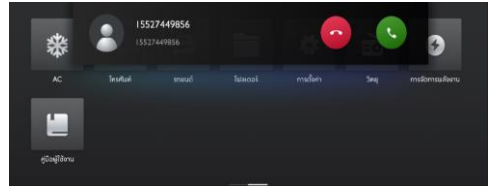

1. Touch to enter KEYPAD interface.
2. Touch to enter RECENTS interface.
3. Touch to enter CONTACTS interface.
4. Touch to make a call to the contact.

Answer an Incoming Call

- Touch  to answer an incoming call.
- Or short press the answer button on the steering wheel to answer the call.

Reject an Incoming Call

- Touch  to reject an incoming call.

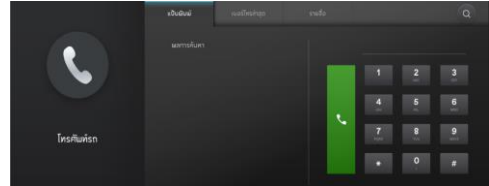

*Car Phone

By using Car phone, you can use the SIM card built in your car to make calls and view your contacts and calling history.

The contacts include mobile phone contacts and local contacts, Click [] to save BT phone contacts as

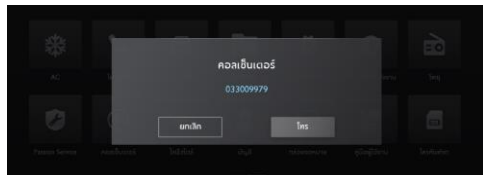

local contacts.

You can create/delete contacts in local contacts.

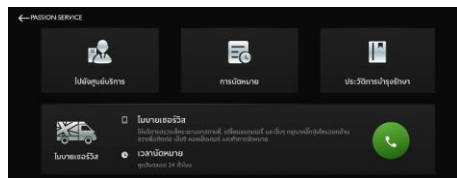

*Call Centre

When the user encounters an emergency, click on Call centre in the menu to trigger the Call Centre function, the call center will provide services.

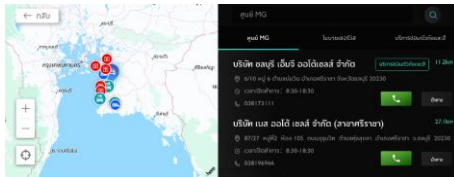

*Passion Service

Click [Passion Service] to enter the Maintenance menu.

1. Touch  to enter the dealer list.
2. Touch  to enter the reservation list.
3. Touch  to enter the Maintenance service record.
4. Touch  to call to call center to book mobile service.

Go To Dealer

Touch  to search dealer name.

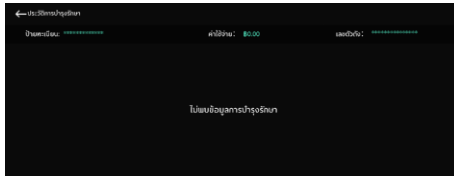

Find the dealer you need. Touch a dealer to locate it on the map.

Reservation

Touch  to go to navigation.

Record

Touch the dealer on the left, switch to display different maintenance record.

*Weather

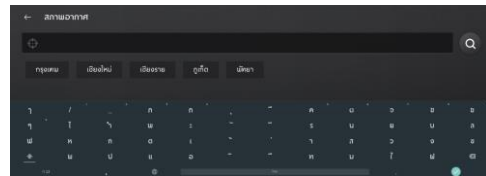

Click the weather module on the home page to enter the weather page. You can view the current weather report and weather forecast of the next 4 days.

1. Click Search to enter the search interface and search for popular city weather
2. Click the setting button to enter the setting interface
3. Click the refresh button to refresh the current location weather

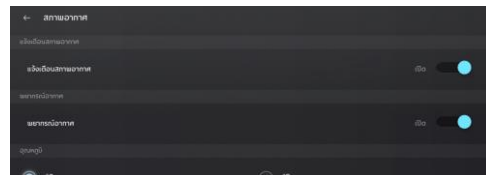

Search a place

Click the  button to jump to the weather details interface and display the current location weather information

(*There is no wifi , Activation and Consent Management in settings of MG4 TT Color Radio)

System

Touch [Setting] on the main interface to enter the System Setting interface, where you can view and set some basic states and functions of the system.

[Reset]: Touch to reset the Factory setting.

Sound

- **SVC**

The speed compensated volume has 3 levels: low, normal and high. Select as desired, or turn it off.

- **Vehicle Alerts**

Touch to adjust the Vehicle Alerts

- **Loudness**

The loudness can be enabled to compensate for deficiencies in the bass and treble ranges at low volume.

- **Phone**

Touch to adjust the Phone Volume.

- **Voice Guidance**

Touch to adjust the volume of Voice Assistant and navigation.

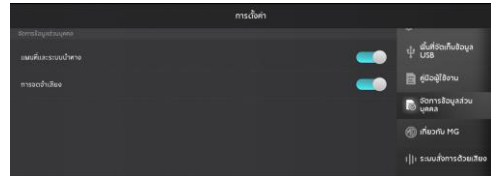

- **Media**

Touch to adjust the Media Volume.

Bluetooth

1.  Users can choose to turn Bluetooth on/off.
2.  Users can delete Bluetooth device.

Air Conditioner

Click on the AC module in the main interface to enter the air conditioning settings page.

The air conditioning settings page contains the following features.

Air Conditioner Switch

The user can operate the air conditioner by clicking the switch. Air conditioning can be adjusted after the air conditioner is turned on.

A/C Switch

Click on the A/C switch to operate the air conditioning compressor. The cooling function can be activated when the air conditioner compressor is turned on.

ECO Switch

Click on the ECO switch to start economic mode.

Auto Switch

Click on the auto switch to start auto mode. If you want to adjust the blower speed, auto mode will be existed.

Temperature Adjustment

Adjustment of the temperature can be realised by using the temperature adjustment scroll.

Blower Speed Adjustment

Adjustment of the blower speed can be realised by using the up and down adjustment button to adjust the air conditioning blower speed.

Air Circulation Mode

Touch the air recirculation mode touch button to switch between air recirculation modes.

Front Defrost

Press the physical front defrost button on the console board to activate front defrost.

Rear Demist

Press the physical rear demist button on the console board to activate rear demist.

Internal recirculation.

During internal recirculation, the air conditioning system circulates the air inside the car to meet the requirements of rapid cooling or heating, and at the same time, it can prevent the entry of traffic fumes

External circulation.

During the external circulation, the air conditioning system draws air from outside the vehicle to ensure fresh air enters the vehicle.

Automatic circulation.

During automatic circulation, the air conditioning system can automatically adjust the internal recirculation or external circulation according to the situation. Note: Leaving the system in internal recirculation mode can cause the windscreen to mist. If this happens, turn on the defrost/demist mode.

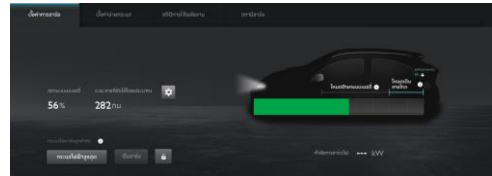

EV

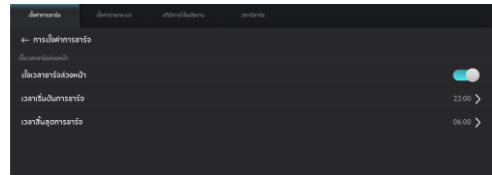

Touch [Energy Management] in the main menu to enter the EV Management Mode, including charge settings, discharge settings, energy consumption and charging station*.

1. Charge settings

- Display the current charging status.
- Switch off the vehicle power system, connect the charging equipment, lock the car. The vehicle will commence charging (on commercial chargers it may be necessary to swipe your charge card or arrange payment).
- Click 'Stop charging', the car will stop charging.
- Click 'Start charging', the car will start charging.

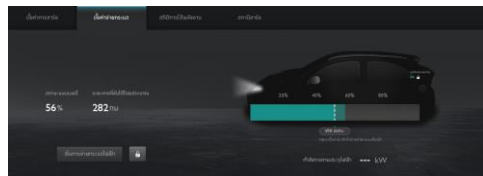

- Click the 'Charging Settings' button to proceed to the 'Charging Setting' interface.
- Click the 'Scheduled charging' switch to set the scheduled charging parameters.

2. Discharge settings

- Plug in the discharge connector to display the current discharge status.
- After setting the discharge power limits, click the 'start discharging' button.
- The vehicle must be connected to suitable electrical appliances in order to allow discharge level settings and commence the discharge process.
- Click 'Stop discharging' when the discharge requirements are complete, disconnect the discharge equipment plug.

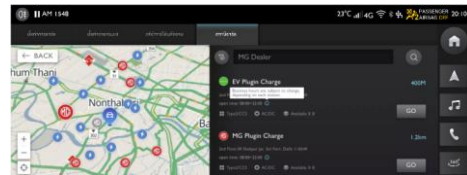

3. Energy consumption

- Click the energy consumption button.
- You can view following details of energy consumption: energy consumption map in 50km, energy flow, total power consumption.

4. Search Charging Station*

- Click the search charging station button.
- You can view following details of charging stations: Name, Address, Type of Connector, Charging Type, Distance and Amount of Available Chargers.
- You can click GO to navigate to the charging station

Vehicle Setting

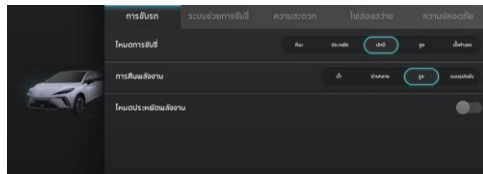

Please click on Vehicle in the menu to enter the Vehicle Setting page.

Driving

Click Driving to enter the Driving Setting page to set up driving.

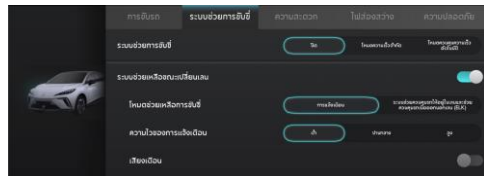

It includes Driving Modes, Energy Recovery and Energy Saving Mode.

Driving Assistance

Click Driving Assistant to enter the page to set up ADAS functions.

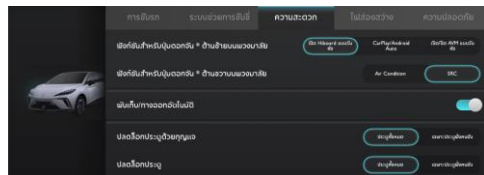

It includes Drive Assist System, Lane Assistance, Traffic Sign Recognition, Front Collision Assist, Rear Driving Assistance System and Unsteady Driving Warning.

Convenience

Click Convenience to enter the set up Steering Wheel, Side Mirror and Lock.

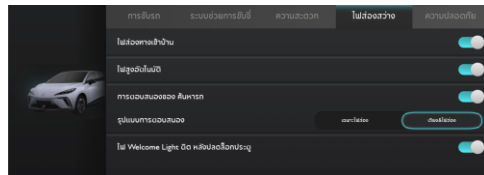

It includes Function for Left * Switch on Steering Wheel, Function for Right * Switch on Steering Wheel, Auto Fold/Unfold, Unlock Using Keys and Door Unlock Modes.

Lighting

Click Lighting to enter the Lighting Setting page to set up Lighting.

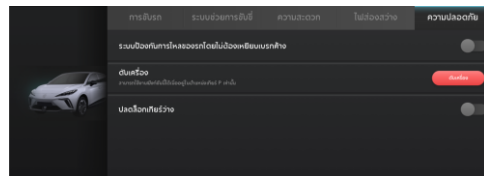

It includes Follow Me Home, Auto High Beam, Find My Car Response and Welcome Lights On After Vehicle Unlocked.

Safety

Click Safety to enter the Safety Setting page to set up safety functions.

It includes Autohold, Power Off and Shift Lock.

*Navigation

The NAV application is designed to provide an intuitive and convenient navigation experience for your daily driving. The fully integrated navigation system brings together the best of in-car dependability and robust connected cloud services. Get reliable directions and current traffic conditions so you know exactly what to expect on your way. The system works best with its cloud-connected services, but you'll also get a seamless, full-featured navigation experience when connectivity is unavailable.

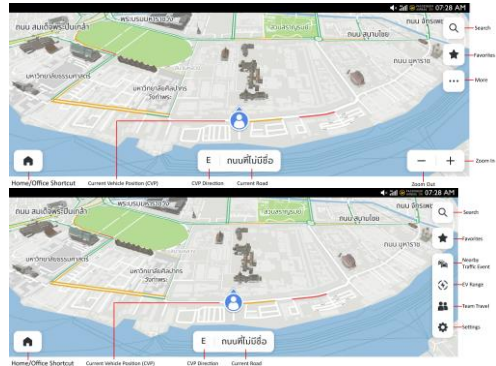

Launch Nav Application

Launch the Nav application by touching the Nav icon on the infotainment home screen.

When the Nav application is launched for the first time, a product walkthrough is available.

Navigation Home Screen

Navigation information is displayed on the entire center screen providing you with a large, interactive map and clear directions easily viewable from the driver seat.

1. **Free Drive Mode**
Search button - Click on the magnifier button to launch one-box search bar

2. Favorites - Click on the favorites button to access your saved POI list including home/office shortcuts
3. More features button - Click on this button for utilizing the system to offer more navigation features
 - 3.1 Setting - adjusting the variety of navigation settings
 - 3.2 Nearby Traffic event button - Launch real time traffic event list for a better understanding of the traffic status around your vehicle
 - 3.3 EV Range Display - Tap to display the reachable areas on a map according to your current battery level.
4. Zoom in/out button - Provide the ability to enlarge or shrink the map view levels
5. CVP (Current Vehicle Position) Direction - Displays the direction your vehicle is heading
6. Current Road label - Helping you to understand the current road name
7. CVP icon - This is where your vehicle is on the map.

Search

Choose your favorite way to search. Look up destinations with One-box Search, discover places to shop and eat using POI categories, or explore what's in the area by simply panning through the map. With so many convenient ways to search, you'll always be able to quickly find what you're looking for.

One Box Search

With strong amount search listings, you'll always find what you need wherever you are with One-box Search. Get relevant suggestions as you type to find your what you're looking for even faster.

Waypoint added

Key Destination Card

Make going to work and driving home everyday even more convenient. Set up key destination card so you get one-tap navigation from your home screen.

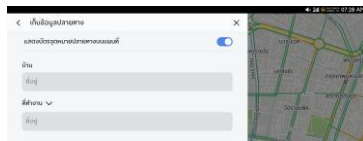

Always know your estimated drive time and route options to the places that mean the most to you no matter where you are.

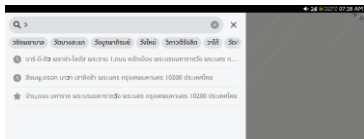

Key Destination Card

You can manually set key destinations from navigation home screen in following sequence: clicking “...” -> “More Settings” -> “Destination Card”. You can set and edit the address in the box below “Home” and “Work”.

You can also reset ‘Work’ to different labels as you prefer.

Destination card Preference

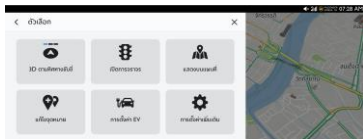

Input from keyboard or favorites list

Options and Settings

Tap  icon to “Options” menu, the following options are listed:

- Map Directions
- Traffic On/Off
- Show on Map
- Edit Destinations

- EV Preferences
- More Settings

Map Directions

Touch the icon to change the map type, the icons and labels will be updated accordingly., available settings include:

- 3D Heading Up: 3D map with head up. In this mode, the current position icon will always keep the head of the car facing up, and the map will rotate around it
- 2D Heading Up: 2D map with head up. In this mode, the current position icon will always keep the head of the car facing up, and the map will rotate around it.

- **2D North Up:** A 2D map with north up. In this mode, as the vehicle turns left and right, the current position icon will switch directions.

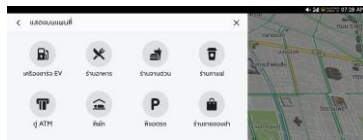

Depending on the zoom level of the 2D Heading Up and 3D Heading Up maps, the system may automatically switch to the 2D North Up map.

Traffic On/Off

Tap it to turn off/on the option “showing traffic on map”.

Show on Map

You no longer have to worry about finding an EV Charge station when battery is low or finding a place to park when you’re in a new area. You’ll automatically be shown EV charge stations around you with hours and pricing as well as where to park and how much it cost. You can also choose to display additional POI icons on your map.

Show on Map

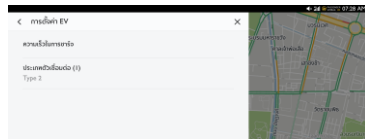

Edit Destinations

Refer to “Add/Edit Waypoints” section.

EV Preferences

Touch the icon to set the EV charger parameters

- Charging Speed
- Connector Types

EV Preference

More Settings

Click on the  and then select “More Settings”, the following features can be adjusted based on individual navigation preferences:

- Destination Card
- Map Preferences
- Navigation Preferences
- Alert Preferences
- Manage History
- About

Destination Card

Refer to “Key Destination Card” section.

Map Preferences

Tap to choose the basic map configurations to display:

- Map Colors - Choose from the three different map colors options:
 - Auto: Select Auto to automatically change modes based on lighting conditions.
 - Day (Light)
 - Night (Dark)
- 3D Landmark (ON by default) - This setting can be turned ON or OFF. When it is turned ON, the system shall display all 3D Landmarks on the map when zooming in from level 5 and beyond.
- 3D Building (OFF by default) - This setting can be turned ON or OFF. When it is turned ON, the system shall display all possible 3D Building

shapes on the map when zooming in from level 3 and beyond.

- **Show Terrain in 3D (OFF by default)** - This setting can be turned ON or OFF. When it is turned ON, the system shall display terrain info on the map in 3D view.
- **Speed Limit (ON by default)** - This setting can be turned on ON or OFF to control the display of speed limit info.

Navigation Preferences

Touch to access the navigation preferences. These choices are:

- **Auto Zoom (ON by default)** - This setting can be turned ON or OFF. When it is turned ON, the system shall automatically adjust the map zoom to a proper zoom level for viewing enough details when the vehicle is approaching a turn.

After the user has completed the turn, the system automatically brings the zoom level back to the original level.

- **Preferred Route:** There are two different route options, Fastest and Eco-Friendly. “Fastest” presents the route with the shortest drive time and “Eco-Friendly” provides the most energy efficient route.
- **Avoid on Route:** Choose any road features to avoid on routes, such as:
 - Highways
 - Unpaved roads
 - Carpool lanes
 - Ferries
 - Toll roads
 - Tunnels
 - Country borders
- **Auto Rerouting:** The following options are available for rerouting:

- Auto Reroute to Better Route - Automatically recalculate better routes-if the system detects a traffic problem ahead, the system will automatically reroute.
- Ask Before Rerouting (selected by default) - If the system detects a traffic problem ahead, the system will display a pop-up window with detailed information about the problem and you can choose to reroute or cancel.
- Never search for better routes - the system will not search for better routes.
- Toll Gate Alerts - display upcoming toll gate
- Traffic Event Alerts - display upcoming traffic event

Manage History

- Clear Recent Destinations - Touch X to clear the recent destinations
- Clear Search History - Touch X to clear the search history

About

Touch to display software information, such as:

- Terms and Conditions
- Privacy Statement
- Navigation Version
- Map Data Version
- Connected Service Expiration

Alert Preference

Tap on to access the alert preference screen.

- Road Safety Alerts - display upcoming road safety alert
- Traffic Camera Alerts - display upcoming traffic cameras (may not be available in all countries).

Battery EV Range Projection

About Range Projection Feature

BEV Range Projection is an especially tailored feature for your beloved MG Battery EV. By utilizing this advanced feature, you will be able to see the real time reachable range as polygon on map so that you can get the full picture regarding maximumly how far you can drive based on current battery remaining. Furthermore, you can ask the system to search for charging stations so you can easily choose one and navigate to it for charging hassle free.

Range Projection polygon on map

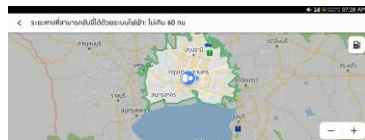

In order to launch the range projection on a map, simply click the range projection button on home map screen.

EV Range

The system will display a polygon identifying the maximum boundary of how far you can drive on the map in the following 2 situations:

- Battery remaining distance $\geq 50\text{KM}$

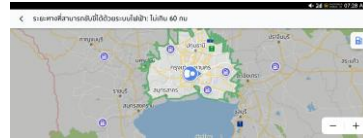

Battery Remaining Distance $\geq 50\text{KM}$

- b. Battery remaining distance < 50KM

Battery Remaining Distance < 50KM

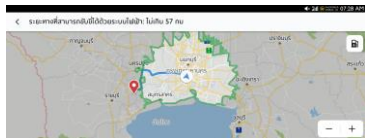

Range Projection in Active Guidance Mode

Search for charging stations in Range Projection Mode

Touch on the charging station icon in the top left corner and the system will display nearby charging stations for you to start navigation to certain ones for your convenience.

Range Projection can also help you identify whether you can make it to the destination with the remaining battery charge easily.

Just click Range Projection in active guidance.

Group Driving

About Group Driving Feature

Group Driving allows you to conveniently team up with your friends, family or colleague to travel easily as a group, sharing a trip with destination would not be any easier. Simply create a new group or join an existing group and have fun.

Launch Group Driving Mode

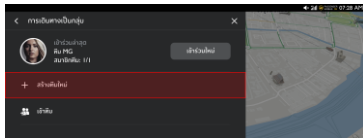

In normal navigation mode, you can easily initiate group driving mode by tapping on ‘Group Driving’ button.

In this mode, you can start creating, joining another group or rejoin the previous joined group. You can also see group members’ locations on map in this mode.

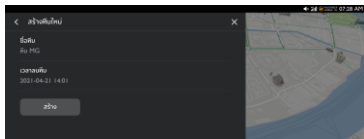

Create a new driving group

By tapping on ‘Create New Team’, you will start the process of new driving team creation.

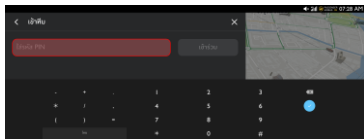

Simply change the team name and team duration you prefer, or just leave them by default. Click ‘Create’ again to establish this new team.

Join another team

If you want to join another team created by others, simply tap on 'Join a Team' button and then input the correct PIN code of the created group.

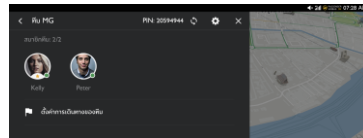

Rejoin the previous team

If you ever feel necessary to rejoin a previous joined team, simply tap on 'Rejoin' button besides the

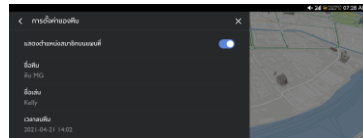

previously joined team info. You will need to enter the PIN code of the previous team.

View team information

You will be able to view team members' icons, names on team information panel.

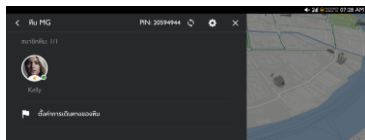

If you are the team owner, tap the settings button , you can start editing team information again. You can also select whether to see team members' real time location on your maps.

Team Trip Management

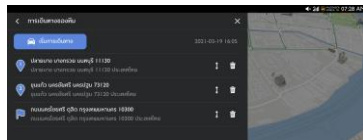

The most important thing for a driving group is the share the fun of driving together. Rest assured we have provided you the most convenient way to fulfill this purpose.

If you are the group owner, you can tap on ‘Setup Team Trip’ to start adding destination and waypoints (up to 3).

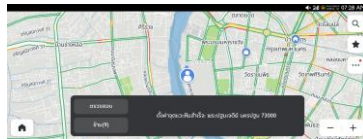

Once you've done planning your trip, simply tap ‘Send to team’ button to share this trip to your team. Your team members will receive the trip plan your setup

and start navigating to your preset destination and waypoints.

Receiving a trip

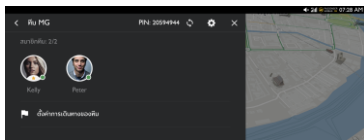

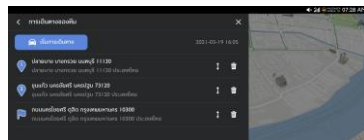

If you are a team member, you will receive shared trip plans from time to time.

You can tap on ‘View’ to view all trip details in team trip management panel, or, dismiss it and visit it later.

Navigation*

Please don't worry if you miss this notice, there will be notification signal on Group Driving button to remind you all the time.

In team trip management panel, you will be able to see the full details about the shared trip just received. Simply click 'Start Trip' to start navigating to these destination and waypoints.

FAQs

Map Information

Road network characteristics are included in the map database of map information. Features include street name, street address, and turn restrictions. The detailed area includes all main roads, side roads and community roads. Detailed areas include points of interest (POI), such as restaurants, airports, banks, hospitals, police stations, charging stations, tourist attractions, and historical monuments. The map database may not include new areas or corrections to the map database completed after drawing. In the detailed map area, the navigation system provides complete route guidance.

Interactive with Map

You can interact with the navigation display by touching different areas of the screen. To explore the map, you can:

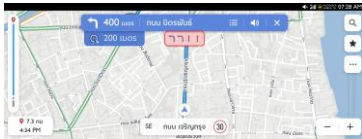

- Zoom in:
 - Tap “+”
 - Spread the index finger and thumb out
 - Double tap with one finger
- Zoom out:
 - Tap “-”
 - Pinch the index finger and thumb in
 - Tap with two fingers
- Pan:
 - Drag one finger left, right, forward or backward
- Rotate map:
 - Place thumb and index finger on map and rotate both to the left or right
- Change between 2D and 3D view:
 - Place two fingers on the map and swipe up or down

Mute

In active guidance mode, audio prompts can be muted when using navigation. Touch the speaker icon on the left

Lane Guidance

If available, the map will show the lane information of the intersection ahead.

Lane guidance

Junction View

When the vehicle is driving on the highway and approaching the exit, the image of the lane will be

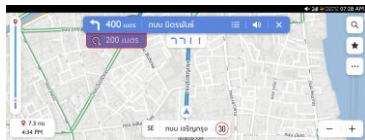

displayed on the screen, and the vehicle must remain in this lane to complete the next turning maneuver.

Junction View

Sharp Turn View

When the vehicle approaches a turn maneuver and the second turn maneuver will appear soon, a sharp turn menu will appear below the main turn menu. The system will send out an audio prompt to notify that a sharp turn is about to occur.

Sharp Turn

Auto Zoom

When a turn is about to be made, the map will automatically zoom in to show the vehicle icon and the upcoming maneuver to provide a better view of the turn. After the turn is completed, the system will return to the previous zoom level.

When There Is No Better Route

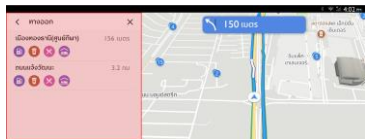

During active guidance, if the system determines that an accident has occurred in the front but there is no better route, the system will play a prompt tone and display a quick notification. This operation only happens once per incident

Expressway Exit List

Touch the exit icon to the right of the current road name below the map to open the exit list. This icon is only displayed when the expressway has a clear exit. When driving on a road with a designated exit, you may be able to use the exit list. The exit list will show the number of exits, the distance between the current vehicle location and the exit, and convenient parking spots that may be available, such as charging stations, restaurants, and residences.

Expressway Exit

Expressway Exit List

Traffic Event Warning

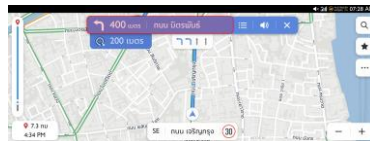

During active and inactive guidance, traffic event warning icons and traffic flow data will be displayed on the map.

Accident Warning

Next Turn Maneuver Menu

During the active guidance, the next turn maneuver turn arrow, turn distance, and street name will be displayed in the "Next Turn Maneuver" menu at the top of the map. Estimated time of arrival (ETA), distance to destination and traffic indicator will be displayed on the right side of the map.

Next Turn Maneuver Menu

Close Guidance and Resume Trip

Touch Cancel icon in the upper right corner to end the active guidance and return to the non-active guidance. If the active guidance is cancelled before reaching the destination, a pop-up window will

Navigation*

appear on the screen, allowing you to choose whether to "Resume Trip".

If you have previously canceled the active guidance, you can resume the trip by touching the "Resume Trip" pop-up window option.

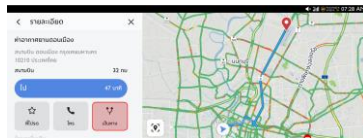

Close Guidance and Resume Trip

Route Options

See up to three different driving paths and ETA to get to your destination and choose your preferred route. Your route options will also consider current road closures and traffic conditions. You won't have to

worry about encountering unexpected road closures, rerouting, and traffic.

Apple CarPlay

3. Please do not use phone while driving to avoid potential danger.
4. Go back to native system from Apple CarPlay by clicking .
5. Disconnect iPhone to exit Apple CarPlay.

1. Connect iPhone to head unit via USB for Apple CarPlay.
2. CarPlay is a smarter, safer way to use your iPhone in the car. CarPlay takes the things you want to do with your iPhone while driving and puts them on your car's built-in display. You can get directions, make calls, send and receive messages, and listen to music, all in a way that allows you to stay focused on the road. Just connect your iPhone and go.

Android Auto

4. Go back to native system from Android Auto by

clicking .

5. Disconnect iPhone to exit Android Auto.

1. Connect Android phone to head unit via USB for Android Auto.

2. Users can access Android Auto functions such as navigation, music, phone and etc. Users can also add 3rd party Apps for Android Auto. Android Auto phone to allow users dial and receive calls. Android Auto let users browse and play music, audiobooks, and other audio content .

3. Please do not use phone while driving to avoid potential danger.

Mobile APP

For vehicles with in-car Internet, users can remotely control the vehicle through the mobile APP, view the vehicle state, plan the travel route, monitor the vehicle position, manage the vehicle information and the like.

Note: For iOS system, only the system of iOS 12.0 or above can download and install the APP.

Note: For Android system, only the system of Android 6.0 or above can download and install the APP.

APP Download

Users can download the APP in the following two ways:

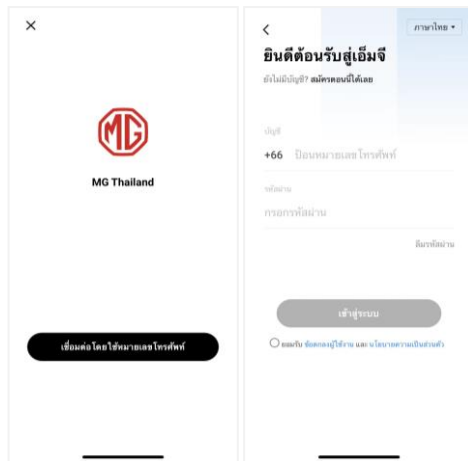

1. Scan the QR code to get the download link.
2. Download from the APP Store.
 - For the iOS operating system, users can search for “MG iSMART” in the App Store and then download.
 - For the Android operating system, users can search for “MG iSMART” in the Google play Store and then download.

Register and Log in

APP Intro Interface

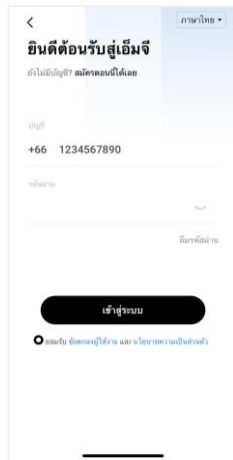

[Register]

Touch [Connect using Mobile Number] in the APP Intro interface to enter the Login interface, touch [Register now] to enter the registration interface, users can register with their phone numbers.

[Log in]

After the completion of account registration, touch [Connect using Mobile Number] in the intro interface to enter the login interface, users can log in the APP by entering their phone numbers and passwords.

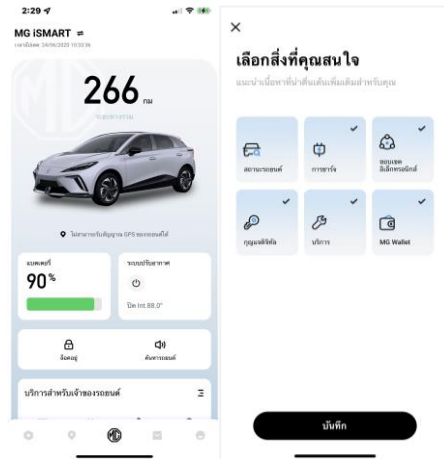

The image shows a mobile application login screen. At the top, there is a back arrow on the left and a language dropdown menu labeled 'ภาษาไทย' on the right. The main heading is 'ยินดีต้อนรับสู่เอ็มจี' (Welcome to MG), followed by the subtitle 'ยังไม่มีบัญชี? สมัครสมาชิกได้เลย' (Don't have an account? Register now). Below this, there is a 'ป้อนรหัส' (Enter code) label, a text input field containing '+66 1234567890', and a 'รหัสผ่าน' (Password) label with a corresponding text input field. A 'ลืมรหัสผ่าน' (Forgot password) link is located below the password field. A large black button with the text 'เข้าสู่ระบบ' (Log in) is positioned below the input fields. At the bottom, there is a radio button selected for 'ขอสมัคร' (I want to register), followed by the text 'เพื่อขอเข้าสู่ระบบ และ ขอใบอนุญาตการใช้งานส่วนตัว' (to request system access and request for personal use license).

Home Page

Tap [MG] icon in the bottom dock to enter the Home Page interface.

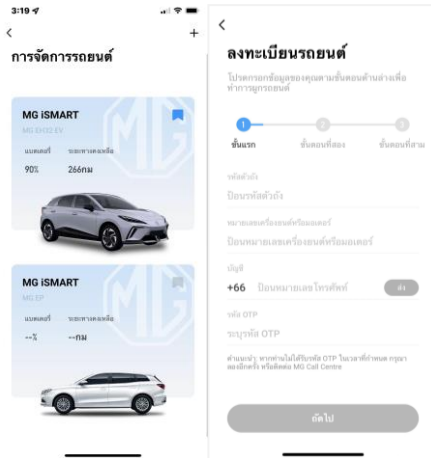

- Users can view the vehicle status.
- Users can lock or unlock the vehicle remotely.
- Users can turn on the air conditioner remotely in advance on hot summer days.
- Users can find their cars quickly in the garage via “Find My Car” function.
- Users can choose which car owner services to be displayed on the home page.

Vehicle Management

Touch vehicle's name in the Home Page of the APP to enter the Vehicle Management interface, which can display the vehicle information bound by the user.

If the user has more than one car, touch the [+] icon at the top-right corner. Fill in the information of the vehicle to be added as per the prompt to add the vehicle, and the user can freely switch to the vehicle currently in use and take controls.

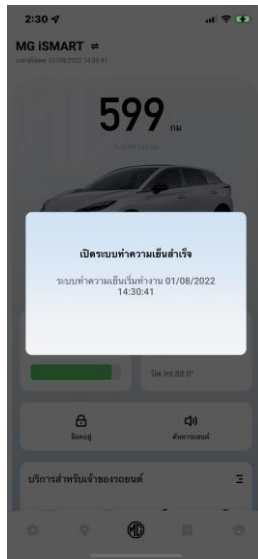

Remote Control

AC On/Off

1. Touch the Air Conditioner ON/OFF button.
2. Enter the PIN code as per the APP prompts. If the PIN code is wrong, re-enter it
3. When the PIN code is validated successfully by the server, the vehicle will turn on/off the Air Conditioner and the APP will provide feedback information.

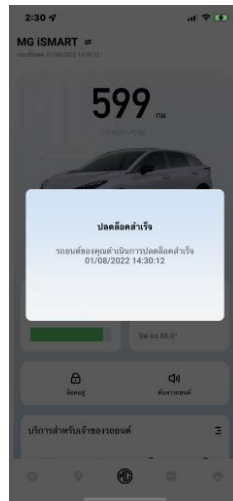

Note: When turning on the Air Conditioner, the engine will be started but the vehicle cannot be driven; when turning off the Air Conditioner, the engine stops.

Note: If there is no other operation in 10 minutes, both the engine and the Air Conditioner will stop.

Lock / Unlock

1. Touch the [] icon.
2. Enter the PIN code as per the APP prompts. If the PIN code is wrong, re-enter it.
3. When the PIN code is validated successfully by the server, the vehicle will perform the lock/unlock operations and the APP will provide feedback information.

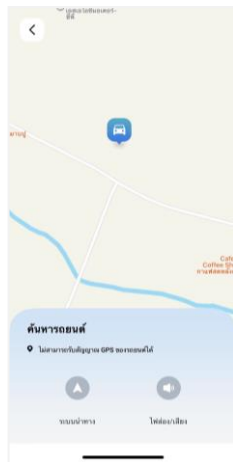

Find Car

- Go To The Car

The function is used to search for the vehicle in a short distance and will provide a navigation route to the vehicle on foot.

- Honking / Lighting

The function is suitable for users who cannot find their cars, for example, in the underground garage, at night, etc. Touch the [Honking / Lighting], and enter the PIN code, after the validation is successful, the vehicle will give out a sound and light up to help the user find it. Touch again to turn off the function.

Vehicle Status

Users can click the [Vehicle Status] in the Home Page of the APP to check the vehicle status.

Mainly detect door lock status, tire pressure, engine status and other items.

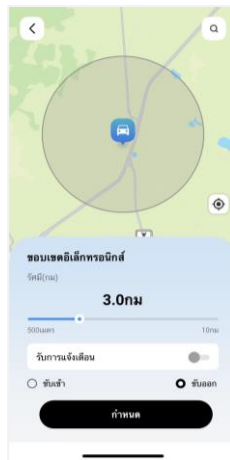

If the vehicle is abnormal, the APP will display the abnormality and its specific reasons. The user can go to the nearby dealer for vehicle inspection; if the vehicle is normal, the user can use the car with confidence.

Electronic Fence

Touch [Electronic Fence] in the Home Page of the APP to enter the Electronic Fence interface. The electronic fence can create a safety barrier for the use of vehicle and provide vehicle state in the APP at any time.

Users can set up the electronic fence at home, company, school or other locations, select the radius range they want, set personalized prompts to provide prompt messages when the vehicle entering or leaving the designated area. Once the vehicle leaves or enters the set area, the security alarm will be triggered and the APP will send SMS to the owner.

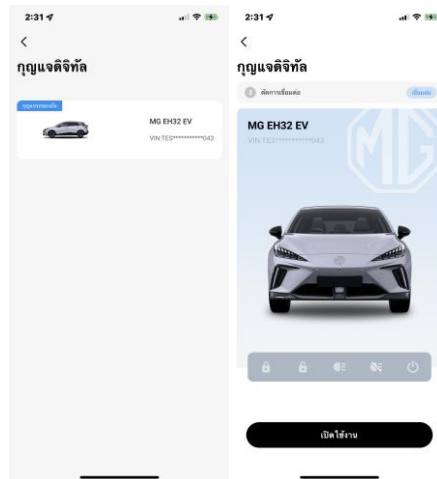

Digital Key

Touch [Digital Key] in the Home Page of the APP to enter the Digital Key interface.

Click the Bluetooth icon to connect Bluetooth, after successfully connecting to the Bluetooth, it will jump to different pages according to the viewing authority of different users.

After the user activates the digital key, the digital key can be used to lock / unlock doors, turn on / off light and honking, and keyless start. And the digital key can be authorized to others or disabled. In the ideal situation where there are no obstacles around the car and the phone is functioning properly, the digital key can lock/unlock doors normally.

However, due to the performance of the mobile phone, any objects that will cut off electromagnetic waves, and other interfering factors, the usable distance of the Digital Key may be shortened or problems may occur.

Service

Touch [Service] in the Home Page of the APP to enter the Passion Service interface. Maintenance information which includes: Service Booking, My Appointment, Maintenance Record, Roadside Assistance.
